

# STUMP GRINDERS

## Stump Grinders

With a choice of 5hp, 9hp or 13hp Honda engines, there is a Power-Mec stump grinder to suit all budgets.

All models have an operator presence control for safety and use a heavy duty centrifugal clutch, ensuring the blade comes to a complete stop in under six seconds.

Well balanced and easy to operate, the Power-Mec stump grinders have low profile carbide tipped blades for smooth, long lasting cutting and will remove the toughest of tree stumps to over 10" below ground level.

MODEL	ENGINE	HANDLE	BLADE DIA.	DRIVE TYPE	WEIGHT
PR130H	Honda GX390 13hp	Heavy Duty c/w O.P.C	9.5" / 24cm	Heavy Duty Clutch	109kg
